CODEBOOK – WAVES 1, 2 and 3

November 24, 2019

Principal Investigator: Claude S. Fischer

Director: Leora E. Lawton

General Notes and Advisements:

1. This codebook covers the Respondent (main) file and the attributes of the named alters. Part I is the main file variables, and Part II is the named alters.
2. This codebook should be used together with the instruments/questionnaires to read the full texts of the questions and – importantly – to understand the skip patterns in the survey (and therefore to understand the nature of missing data in the answers—i.e., not applicable versus not answered).
3. Missing data are indicated in various ways, depending on the question sequence and mode (in-person or web), whether the variable is numeric or string, and whether the respondent was offered a missing option such as “don’t know”. Missing data can be blank, “.”, “.e,” “.n,” “.d,” , or a user-specified code (often 8, 9, or 99); it is important to exam the variables to ascertain the appropriate missing data codes. In the frequency tables “Missing--System” refers to missing data coded blank or “.”(depending on software).
4. Variables with more than 33 values were not included in the codebook frequencies, but placeholders are included for your reference. They are in **purple font**.
5. Variable names in the main survey (e.g., a2a, g13a, h12) generally designate sections of the instrument. However, do not assume they are in exact sequence. (Some were moved around or inserted over the course of instrument development and some were dropped.)
6. Actual alter names do not appear here or in the Names file for confidentiality purposes—only ID numbers.
7. Some open-ended questions have more than 100 responses and the frequencies do not appear in this codebook. For other open-ended questions, a limited number of cases have been edited to replace personal identifiers with a generic placeholder , e.g., <name> instead of a personal name.
8. Open-ended answers contain personal information and have been removed from the public use data set. These variables appear in **green font**. Contact the PI if you wish to have access to these data.
9. The Frequencies include the variable name and label, e.g., ‘mode’ is the variable name and ‘FTF vs Web’ is the label.
10. Variables with an ‘sc’ prefix are screener questions. Not all screener questions are included in the main file as most were for identification of the targeted age groups and for random selection.
11. Variables with a ‘ho’ prefix are items queried of interviewers about the respondent’s home.
12. Variables with an ‘in’ prefix are items queried of the interviewers about the respondent behavior.
13. Answer categories labeled “Volunteered” apply to in-person interviews.
13. Corrections of the data continue. Please let us know of errors that you find by writing to ucnets@berkeley.edu.

PART I: Main File (Ego) Variables

Prim_key: Primary Key – Unique Identifier of Respondent

Note: Prim_key values beginning with 8 designate either referral or Facebook samples rather than the household address samples.

Beginntime: Time stamp start of survey (in this format: YYYY-MO-DD HR:MN:SE)

Endtime: Time stamp end of survey (in this format: YYYY-MO-DD HR:MN:SE)

Variables beginning with 'sc' are screener variables.

b2a_count “number of named to social activity”

Note: This variable and the other ones like it are based on the number of answers respondents gave to the question, uncorrected (as of 9-2019) for errors (e.g., listings such as “my family”). Although the error rate is quite low, a more precise count can be obtained by aggregating the count from the Names file. (For example, for 1.2% of respondents the aggregated count is one fewer than this count; for 0.4% of respondents, it is two or three fewer.)

d3_w2 any errors in names

Note: Respondents are shown the lists of names they provided in w1 and w2 and the connections (e.g., dad = father) and are asked if they see any errors. The open-text answers were used to correct the names and the proper connections in the Names file (e.g., “dad” is my biological father; “Father” is my step-dad). Most answers confirmed links (e.g., “Jen is Jenny”) or clarified spellings.
